EDUCATION

Washington University in St. Louis

St. Louis, MO

Bachelor of Science in Computer Science; Minor in Linguistics

Aug. 2024 – May 2028

- GPA: 3.89/4.0; Relevant Courses: Data Structures and Algorithms, Object-Oriented Programming, Introduction to Machine Learning, Computational Linguistics, Multi-Agent Systems

EXPERIENCE

Amazon

Arlington, VA

Software Development Engineer Intern

May 2025 – Aug. 2025

- Engineered foundational vision-language models and data processing pipelines for real-time sports broadcast analysis, scaling content coverage capacity from 4,000 to 250,000 instances (60x increase) for Amazon Prime Video Sports, creating the first automated, AI-augmented broadcast state detector within the company.
- Designed pub-sub and Lambda microservice architecture in AWS to process live content analysis with sub-5 second latency, successfully meeting director-provided service-level agreements for Prime Video Sports operations.
- Established multiple AI Safety guidelines and wrote comprehensive service documentation for stakeholder alignment on critical service decisions, providing guidance on how to effectively modify systems within the service.

WashU Robotics

St. Louis, MO

Nimble Project Lead and Software Lead

Aug. 2024 – Present

- Trained industrial articulated robot arm using the NORA 1.5 foundational vision-language-action model with reinforcement learning and fine-tuning techniques in Python to achieve out-of-distribution generalization and long-sequence planning on human manipulation tasks.
- Led a 15-member software and electrical team within a 100+ member org, defining project roadmap, milestones, and deliverables for an autonomous robotic arm to write sentences.

WashU Google Developer Group

St. Louis, MO

Delivery Project Lead

Aug. 2024 – Present

- Spearheaded a cross-organizational partnership between WashU Robotics and WashU Developer Student Club to bring robotic food vendor delivery to students and staff.
- Led a 6-member software team within a 200+ member org, defining project roadmap, milestones, and deliverables for a client-side delivery web application targeting a Fall 2026 pilot.

PROJECTS

LLM Council | *React, LM Studio*

Jan. 2026 – Present

- A personal project forked off of Andrej Karpathy's LLM Council project to add council support for local LLMs.

Chorus | *React, FastAPI, Google Gemini API, Railway*

Oct. 2025 – Dec. 2025

- A school project for CSE 204 (Web Development) at WashU to have LLMs debate in a multi-agent system.

HONORS & AWARDS

WashU Google DevFest Hackathon Honorable Mention

April 2026

WashU Academic Dean's List

Fall 2024, Spring 2025, Fall 2025

Advanced Placement Scholar with Distinction (16 AP Courses)

Jul. 2024

Congressional App Challenge Winner (Project recognized at U.S. Capitol)

Apr. 2024

Amazon Future Engineer Scholarship (1 of 400 worldwide, 1 of 3 Missouri)

Mar. 2024

National Merit Commended Scholar, Missouri

Sep. 2023

FIRST Robotics Dean's List Finalist (300 of 85,000+ participants)

Mar. 2023

FIRST Robotics World Championship Qualifier (2x)

Apr. 2022, Apr. 2023

TECHNICAL SKILLS

Languages: Python, Java, C++, TypeScript, SQL, JavaScript, PHP, HTML, CSS, Arduino C, Bash, Go

Libraries: React, FastAPI, NumPy, Matplotlib, pandas, JUnit, SynthID, transformers, sklearn, ollama, PyTorch

Developer Tools: AWS (Lambda, SNS, SQS, Bedrock, EC2, CloudWatch), Git, Terminal/CLI, CI/CD

Areas of Interest: AI Safety, AI Alignment, Small Language Models, Robotics, Language Model Watermarking
